

JCR Cleaning System

Ion-Stream Commercial *in-store cleaning system*

There is no easier, safer or better way to clean your jewellery.....

All our products are designed for a very long life. It is our philosophy as a manufacturer that our responsibility to our customers and the environment continues after the product is sold.

The Ion-Stream Commercial is designed for routine cleaning of jewellery for display and specifically to clean jewellery set with delicate or chemically reactive stones. It is made to be versatile and simple in use.

Ion-Stream cleaning will perform tasks not possible with ultrasonic cleaners. Its principal use is the quiet, quick and safe removal of tarnish from the surface of gold and silver. It can also be used to clean stainless steel and other metals.

The Ion-Stream Commercial can be operated with great advantage when used in conjunction with an ultrasonic cleaner.

The jewellery is placed in a non-hazardous electrolyte which has a pH of approx.. 9.5 (toothpaste is approximately pH10). This means that it is slightly alkaline and cannot damage chemically active gems like ironstone, lapis lazuli, turquoise, coral, pearls etc

- Rechargeable - up to 200 cleaning cycles per charge. Supplied complete with charger.
- Ultra-simple to use and is fully automatic. Just attach the item to be cleaned, and dip it into the solution - Fast, safe and simple to use.
- Will keep gold and silver jewellery in as new condition, will freshen tired looking retail stock in seconds.
- Will clean gold and silver jewellery set with any natural stone including pearl, coral, shell, lapis lazuli, opal, emerald, hematite safely.
- Can be used in conjunction with any ultrasonic cleaner combining the strengths of both systems.
- No loss of precious metal.
- Fantastic results on diamonds.
- Cannot damage metal or stones.
- Non hazardous cleaning fluid. Safe for the operator.
- This product works, is inexpensive to buy, extremely economical in use and is covered by a 12 month commercial use guarantee.
